

Sprint 4 Report

PayPerRead 2-24-22

Actions to stop doing

- Nothing, we feel very good about how our last sprint went and we don't think we developed any bad habits in this project.

Actions to start doing

- Higher focus on security
- Continual progress (build on user stories)
- Listening to the linter (fixing linter errors)

Actions to keep doing

- Continue to build on the website throughout the sprint, finish tasks early.
- Have more extended meetup/work sessions to concentrate and develop full stack features, along with receiving feedback in real time.
- Updating each other via sprint standups so that we all get a better understanding of how much progress we are making.
- Keep up with the solid attitudes and good vibes.

Work completed/not completed:

We completed all of our user stories for sprint 4. Including the following tasks.

- Retrieving parent URL while purchasing article
- Add money to account using stripe frontend
- Add confirmation of purchase page to iframe
- Make URL a backend url constant
- Loading page for signup and login
- Manager publisher view current balance
- Improved about us design
- Show reader balance in iframe
- Prompt reader to recharge if insufficient balance
- Third article with optional subscription

Work Completion Rate

We finished 100% of the tasks for sprint 4. We averaged 13 hours between the group. Some learning, design, and coding involved.
